## SUBJECT INDEX

Afferent nerves
  diaphragm, cortical projection, 213
  pulmonary, inspiratory muscle activity, 159
Airflow
  mouth *vs.* chest, 67
Airways
  $CO_2$ reflex response, 289
  obstruction, collateral ventilation, 145
  resistance, $O_2$, $CO_2$, 261
  smooth muscle, histamine, 239
Allosteric modifiers
  hemoglobin, 3

Birds
  chicken, 227
  duck, 325
  rooster, 185
  zebra finch, 125
Blood gases
  phrenicotomy, 47
Body temperature
  phrenicotomy, 47
Breathlessness
  $CO_2$, tidal volume (quadriplegics), 19
Bronchospasm
  $O_2$, $CO_2$, 261

Carbon dioxide
  ventilatory response (zebra finch), 125
Cardiogenic mixing
  edema, 135
Carotid chemoreceptors
  dopamine, 173
  norepinephrine, 299
  sensitivity $CO_2$, $O_2$ steps (duck), 325
Collateral ventilation
  alveolar slope, 145
Control of breathing
  arterial chemoreceptors (duck), 325
  breathing pattern, exercise, 311
  carotid chemoreceptors, 173
  carotid chemoreceptors, norepinephrine, 299
  $CO_2$ sensitivity, development (zebra finch), 125
  end-expired pressure, inspiratory muscle activity, 159
  mesencephalon, 31
  pattern, exercise, 201
  respiratory sensation, 19
  thalamic neurons, 99
Cortex
  evoked potentials, phrenic afferents, 213

Development
  chick embryo, tissue $P_{O_2}$, 227
  $CO_2$ sensitivity (zebra finch), 125
Diaphragm
  fatigue, cortical projection, 213
Diffusion
  $O_2$ membranes, 351
Disease
  COPD, phase difference airflow, 67
Dyspnea
  $CO_2$, tidal volume (quadriplegics), 19
  mesencephalon, 31

Edema
  alveolar gas mixing, cardiogenic oscillations, 135
Emphysema
  stress-strain, lung tissue, 251
Exercise
  mode, pattern breathing, 201
  norepinephrine, carotid chemoreceptors, 299
  training, breathing pattern, 311

Fatigue
  respiratory muscles, 213
Fish
  eel (*Anguilla anguilla, A. rostrata*), 341

Gas exchange
  intrapulmonary gas mixing, 145
Gas mixing
  alveolar, cardiogenic, edema, 135

Heat loss
respiratory, hyperbaria, 377
Hemoglobin
evolution, vertebrates, 3
High frequency ventilation
lung receptors, 115
Histamine
receptors, airway smooth muscle, 239
Hyaline membrane disease
vasoactive lipid mediators, 363
Hyperbaria
respiratory heat loss, 377
Hypercapnia
thalamic neurons, 99

Impedance
lung lobe, pleura, 271
Inert gases
cardiogenic mixing, 135
high ambient pressure, respiratory heat loss, 377
insoluble, collateral ventilation, 145
Innervation
trachea, mechanoreceptors, 55
Ischemia
heart, $O_2$ diffusion, 351

Kinetics
red cell $O_2$ uptake, Root effect (eel), 341

Larynx
$CO_2$ reflex response, 289

Mammals
cat, 31, 99, 159, 173, 213, 289
dog, 55, 87, 135, 271
goat, 299
hamster, 251
humans, 19, 67, 201, 239, 311, 377
monkey, 363
rabbit, 115, 261
rat, 47, 351
Mechanics of breathing
impedance, elastance, lung lobe, pleural samples, 271
$O_2$, $CO_2$ effect bronchospasm, 261
stress-strain, lung tissue, 251
Mechanoreceptors
resistive loading (rooster), 185
Mediators
dopamine, carotid chemoreceptors, 173
norepinephrine, carotid chemoreceptors, 299
vasoactive lipid, 363
Mesencephalon
respiratory rhythmicity, 31, 99
Microcirculation
$P_{O_2}$ (chick embryo), 227
Mitochondria
membrane, $O_2$ diffusion, 351
Model
alveolar slope, 145
Muscles
expiratory, mechanical properties, 87
Myocytes
ventricular, $O_2$ diffusion, 351

Nerves
respiratory motor, $CO_2$, 289

Oxygen exchange
red cells, Root effect (eel), 341

Pattern of breathing
exercise modes, 201
training, exercise, 311
Pharmacological agents
domperidone, 299
dopamine receptor blocker, carotid chemoreceptors, 173
phenoxybenzamine, 299
propranolol, 299
Phase difference
airflow mouth *vs.* chest, 67
Phrenicotomy
blood gases, body temperature, 47
Pleura
mechanical impedance, 271
Prostanoids
cyclic lung stretch, 363

Receptors
arterial chemo (duck), 325
histamine, bronchial smooth muscle, 239
mechano, extrathoracic trachea, 55
mechano, metabo, diaphragm, 213
pulmonary, HFOV, 115
Red cells
kinetics $O_2$ uptake, Root effect (eel), 341
Resistance
airways, $O_2$, $CO_2$, 261
lung lobe, pleura, 271
resistive loading, mechanoreceptors (rooster), 185

Respiratory muscles
inspiratory activity, end-expired pressure, 159
Root effect
eel, 341

Sensation
respiratory, 31
respiratory, thalamic neurons, 99
Smooth muscle
bronchial, histamine, 239
Stress-strain
lung tissue, 251

Temperature
expired *vs.* inspired air, 377
Thalamus
respiratory rhythmicity, 99
Tissue
$P_{O_2}$, microvascular density, 227
Trachea
extrathoracic, mechanoreceptors, 55

Vasoactive lipid mediators
cyclic lung stretch, 363
Ventilation
conventional mechanical *vs.* HFOV, vasoactive lipid mediators, 363
Vertebrates
hemoglobin, 3
